

CampusAssetIQ — Quick Visual Overview

Smart Hardware Asset Tracking & 5-Second QR Complaint System

LIVE 24/7 Cloud Hosted	5 SECONDS QR Mobile Report	20+ LAKH Records Capacity	ZERO Phone Calls Needed
----------------------------------	--------------------------------------	-------------------------------------	-----------------------------------

1. What Is CampusAssetIQ in 1 Simple Sentence?

■ It replaces all messy Excel sheets & phone calls with a simple website: Every computer gets a QR sticker. Doctors scan it with their phone camera to report issues in 5 seconds, and IT sees everything on one live screen!

2. How It Works in Real Life (3 Simple Steps)

STEP 1: POINT PHONE CAMERA	STEP 2: PICK ISSUE & SUBMIT	STEP 3: IT DESK FIXES IT
• Doctor/Nurse scans QR sticker on the computer. • Opens instantly on phone. • No login required!	• System already knows PC tag & room. • Doctor taps: 'Screen Flickering' or 'No Internet'. • Taps Submit (5 seconds total).	• Ticket pops up on IT Admin screen instantly. • Technician sees exact room & machine. • Marks 'Resolved' when fixed.

3. The 4 Main Features (All Working Live Right Now)

■■ 1. Complete Inventory • Tracks CPUs, Monitors, Keyboards, Mice, Printers. • Search by Doctor name, Serial number, or IP. • 1-Click Excel Import & CSV Export.	■■ 2. Instant QR Stickers • Adding a PC in Inventory auto-creates a sticker! • Only vital info printed: Tag, User, Room & QR. • Print 1 sticker or a full A4 sheet in 1 click.
■ 3. Location Explorer • Click any building → floor → room. • See all machines in ICU, Trauma, or Lab at a glance. • Instant count of working vs. spare computers.	■■ 4. Breakdown & Servicing • Tracks repair times (how long was PC down?). • Preventive Maintenance (PMS) schedule tracker. • Tells you when vendor servicing is due.

4. Tech Stack (Explained for Non-Programmers)

Where is it hosted?	In the Cloud (Render, Singapore) . Runs 24/7 even if all our laptops are turned off.
Where is data saved?	In a real PostgreSQL Database . Super safe, holds 20,00,000+ records (50+ years) .
Why is it so fast?	Built with Python & Django . Zero slow loading, zero heavy lag.
How do we update code?	Connected to GitHub . Any change we make goes live in 60 seconds automatically.
Is it secure?	Has official HTTPS SSL Green Lock . Allows phones to safely use camera for QR scanning.

5. Live Links (Open On Any Phone or Laptop)

■ Main Website:	https://it-support-6np1.onrender.com
■ Mobile QR Report:	https://it-support-6np1.onrender.com/report/
■■ Asset Tag Center:	https://it-support-6np1.onrender.com/tag/
■ Admin Command:	https://it-support-6np1.onrender.com/admin-login/

6. The Only Step Needed from University IT (Takes 2 Minutes)

To make our official link support.swaminarayanuniversity.ac.in open this site, our network admin just adds **1 simple CNAME in DNS**:

Type: CNAME	Name: support	Points to: it-support-6np1.onrender.com	100% Safe (Zero risk to main website)
